Subject: RE: Media Questions on CFAC Superfund Site

+ Lisa as I am out today. I will defer to Andrew/Lisa as to whether prior approvals from HQ on content related to this topic mean we can proceed with responses.

I am forwarding this email string to you for your review and input. When Mike develops draft responses, I will pass those to you, too.

Thank you,

Joe

Subject: Questions on CFAC Superfund Site

Hi Mike. This Christopher Salas from NBC Montana that you spoke with on the phone recently and here are the questions I have:

1. In layman's terms, what are the most important discoveries that come out from the initial review?
2. This is the first round of sampling, how many steps are there? And where do we go from here after the initial review?
3. Do we have enough information to know how this may or may not affect property owners living around the plant?
4. Can you make a determination about whether or not this is affecting local drinking water? How much does it impact nearby water sources such as the Flathead River?

If possible, could you let the media contact know that my deadline is at 2 pm today so this is a matter of urgency.

Thanks for your time Mike!

Christopher Salas

Subject: call from NBC

Hi Lisa,

I just got a call from Christopher Fallis (sp) from NBC News who wanted about 10 minutes of my time to do a phone interview about the findings and upcoming public meeting for CFAC. I told him he would have to send me the questions and I would pass them on to you and we could go from there. He asked if he would get a statement or if he would be able to talk with me. I told him we would have to wait and see.

I'll let you know when I get the questions.

Mike
